

## LA-1015 2in1 Cable Identifier&DMM

La-1015 is a transmitter/receiver device which enables one to instantly match up ends of individual cores at either end of a multi-core cable. With the remote kit it can test cables installed far away either on wall plate or patch panel. DMM function make it easy to measure DC/AC voltage, DC/AC current, Resistance, continuity & diode.

### Specification:

| Function        | Max.Range              | Basic Accuracy |
|-----------------|------------------------|----------------|
| Voltage DC      | 600V                   | ±0.5%          |
| Voltage AC      | 600V                   | ±1.2%          |
| Current DC      | 200mA                  | ±1.5%          |
| Current AC      | 200mA                  | ±2.0%          |
| Resistance      | 20MΩ                   | ±0.8%          |
| Continuity Test | Beep if less than 100Ω |                |

### Transmitter:

|                  |                                 |
|------------------|---------------------------------|
| Display          | Two blue LED lamps              |
| Alligators       | 17 croc clips-Red x16 Black x 1 |
| Cable resistance | 10K Ohm max.                    |

### Receiver:

|            |                                 |
|------------|---------------------------------|
| Display    |                                 |
| Alligators | 2 Croc Clips-red x 1, Black x 1 |

Accessories: 9V battery and two AAA batteries, remote terminator, holster, cables, test leads, gift box with carrying case.
